## DETAILED ACTION

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1 and 3-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Weth '556 alone. Weth shows a method for body treatment comprising: a sonic transducer (9) immersed in a liquid filled container (1), and inherently placing and exposing a person to acoustic waves. Although Weth does not explicitly state the range of frequencies, Weth does disclose variable frequencies via control (74), of which some frequencies would be considered "low". Limitations drawn to various distances, times, or types of diseases being treated, such limitations are considered as obvious art-recognized alternate uses or ranges which the present reference is capable of accomplishing given the fact that all of the structural limitations of the invention have been disclosed.

### ***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 1 and 3-21 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as

Art Unit: 3764

to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. It is unclear how someone who is suffering from inflammatory musculoskeletal connective tissue disorder can be treated by acoustic waves at a distance of between 1 to 20 feet, no matter how long the treatment may occur. How can any acoustic waves be felt, perceived, or received at a distance of 20 feet, especially when the device is submerged in a liquid? The specification has not demonstrated how these limitations may be accomplished.

***Claim Rejections - 35 USC § 101***

5. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1 and 3-21 are rejected under 35 U.S.C. 101 because the disclosed invention is inoperative and therefore lacks utility. Please refer to rejections under 112.
